

The International Achondroplasia Forum presents

Shaping the Future of Care in Achondroplasia and Related Conditions 2026

Friday 11th September

Radisson Blu Hotel, Marseille, France

It is an exciting time in the management of achondroplasia and related conditions, and the IAF is delighted to introduce a conference focused on sharing experience and practical guidance to enhance care for affected individuals. The programme equips attendees with the knowledge, skills, and professional connections needed to optimise outcomes for those they support.

The conference will cover key areas of clinical management of achondroplasia and related conditions with the aims of:

- Reviewing target treatment pathways and therapeutic options available in clinical trials and commercially
- Understanding and addressing challenges to management in clinical practice
- Sharing experience and offering practical guidance for providing optimal care for individuals
- Supporting and promoting collaboration within the achondroplasia community and communities for related conditions

For registration, programme details, and our abstract submission guidelines, visit our website for more information:
